

Every Successful Person or Great Genius have **THREE Particular **QUALITIES** in common. Plus they know the 5 Laws of Success.**

*They produce a prodigious amount of work,
They never know fatigue, Their minds grow more brilliant as they age.*

- Humility, the personal EGO must go (EGO= edging God out, as DR W Dyer put's it)
- Reverence, if you look reverently in the inward direction towards your inner self you will be amazed at what you will find.
- Inspiration, comes only to those who see it with humility towards their own achievements and reverence to a higher being.
- Deep Purpose, you have to gather your thought energy into a high potential direction, thinking is a dynamic state of motion which conceives images and forms.
- Joy, which is happiness, enthusiasm, intuition, effervescence and ecstasy. the greater the joy within one's inner consciousness, the greater the positive force with in you.

“The man who tapped the secrets of the universe” by Glen Clark

“I know you will grasp the above and become a new person, I wish this for you, go well”.
